

Actual unit is contained inside a metal chassis with an 11 pin socket (S1) and a short 11 pin cable with a male plug on the end (P1). All pins not called out on this diagram are passed directly from the plug/cable to the socket, with the exception of pin 11. S1 Pin 11 goes to this board. P1 Pin 11 is not connected. All information is believed accurate but is provided AS IS with no guarantee as to it's accuracy.
