

INSTALLATION INSTRUCTIONS
FOR
LESLIE CONSOLE CONNECTOR KIT 7017 FOR MODEL 16 SPEAKERS
AND
LESLIE CONSOLE CONNECTOR KIT 7020 FOR MODEL 18 SPEAKERS

These kits install in the same manner, differing only in the type of sleeve adapter used. In the 7017 Kit, an 012377 crossover adapter is supplied. This adapter channels only midrange frequencies to the Model 16 speaker. In the 7020 Kit, an 065227 adapter is used. This adapter channels all available signal to the Model 18 speaker.

CAUTION: Before proceeding, make certain all power to the amplifier and LESLIE speaker is disconnected.

1. Locate cable and foot control. A long and short cable are attached to the foot control. Connect longer cable's socket to plug at rear of Model 16 or Model 18 cabinet connector. (See "A" on Fig. 1.)
2. Connect shorter cable's socket to one end of the adapter. Make certain to use an 012377 adapter for Model 16 installations; an 065227 adapter for Model 18 installations. (See "B" on Fig. 1.)
3. Connect the sleeve adapter to the 6 contact socket on the phone plug and jack connector. (See "C" on Fig. 1.)
4. Detach phone plug "D" from speaker jack "E" at rear of amplifier. **DO NOT USE EXTERNAL SPEAKER JACK.**
5. Plug phone plug "F" into speaker jack "E".
6. Plug phone plug "D" into phone jack "G".
7. Plug in AC cords from the amplifier and LESLIE speaker. Installation is now complete.

Consult the Model 16 or Model 18 Owner's Manual for an explanation of the foot control's switch functions.

SCHEMATIC: 7017 KIT; 7020 KIT
